## REASONS FOR ALLOWANCE

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a combination dispensing device and shelf, classified in class 222, subclass 192.
  - II. Claims 19-20, drawn to a shelf, classified in class 211, subclass 119.03.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because details of the subcombination such as the first and second pairs of posts extending outwardly from the first bottom surface has been omitted from the combination of Group I. The subcombination has separate utility such as a shelf mounted directly to a wall without a dispenser.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3754

2. During a telephone conversation with Ray Weber on 25 May 2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-18. Affirmation of this election must be made by applicant in replying to this Office action. Claims 19-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

*Examiner's Amendment*

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In Reference to Claim 1

In line 12, "stop" has been changed to --top--.

In Reference to Claim 14

In line 14, "stop" has been changed to --top--

The above amendment was necessary to correct an obvious typographical error.

Art Unit: 3754

5. This application is in condition for allowance except for the presence of claims 19-20 to an invention non-elected without traverse. Accordingly, claims 19-20 have been cancelled.

*Examiner's Statement Of Reasons For Allowance*

6. The following is an examiner's statement of reasons for allowance:

In a dispenser mounted to a wall surface for dispensing a fluid from a container including a base mounting plate and a cover capable of movement between open and closed positions relative to the base mounting plate according to claims 1 or 14, the inclusion of a mini-shelf unit having a main body portion and a hook portion with respective first and second top surfaces, a hole in the second top surface, a hook on the hook portion, a hump segregating the first top surface and the second top surface, and an L-shaped connecting bracket was included in all of the claims but not found or suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Bomberg whose telephone number is 571-272-4922. The examiner can normally be reached on Monday, Tuesday, Thursday and alternative Fridays.
